

Unrivalled power and robust strength of The Beast

Introducing the 827 DVJ Rotary Blower, rugged reliability for the vacuum truck industry

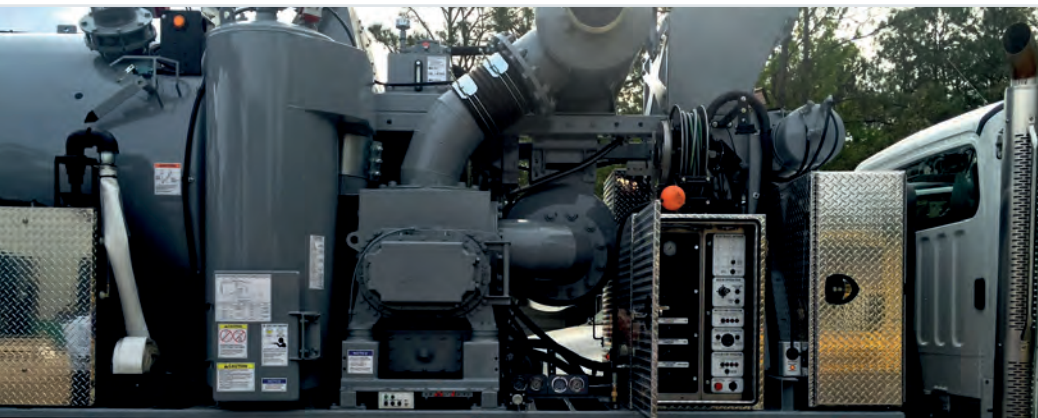

Faster Loading

Reduced weight

Smaller footprint

Rugged reliability

Ultra robust

Rugged reliability for the vacuum truck industry

With the advanced design of the 827 DVJ you get:-

Gear End Driven design for greater reliability in direct drive applications.

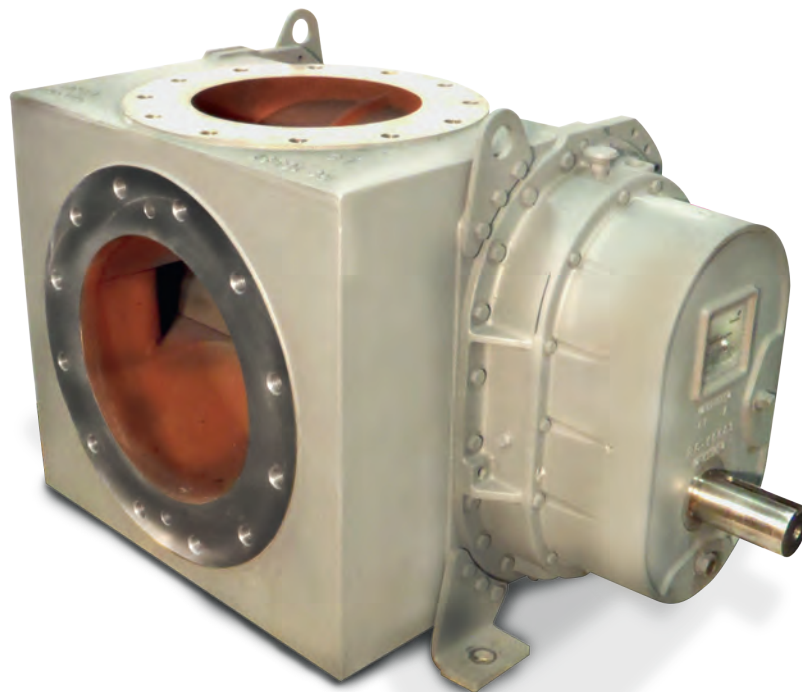

Patented DVJ Whispair® jet allows cool, atmospheric air to flow into the cylinder for continuous operation at vacuum levels to blank-off (28" Hg).

Cylinder casting with integral manifolds provides a compact and lightweight solution giving you more load carrying capacity.

Universal design to easily accommodate any required shaft and discharge location.

Taper-fit single-piece timing gears for reduced maintenance.

Inlet and Discharge connections in standard ANSI flanges.

Vacuums to 28" HG *
5775 CFM of FREE AIR
