## M-D Pneumatics®

EQUALIZER DM | 4504, 4506, 4509, 4512

# **Equalizer DF**

Models: 4504, 4506, 4509, 4512

Bi-directional Rotation 17 Series - Horizontal Air Flow 46 Series - Vertical Air Flow

Designed to be interchangeable with equivalent Gardner Denver Duroflow® models, EQUALIZER DF rotary positive blowers offer many distinct advantages.

## **Features**

## **Higher Pressure Capability**

Due to the high degree of precision to which EQUALIZER DF blowers are manufactured, most models are rated to 18 PSIG discharge pressure. This provides you with an increased level of security since your EQUALIZER DF blower has more safety factor already built in.

## Designed for True, Drop-in Replacement

The last thing you need is an "interchangeable" blower that really isn't. EQUALIZER DF blowers are designed to be dimensionally interchangeable with competing models, even to the point of matching the port connector bolt patterns.

## **Helical Gearing**

EQUALIZER DF blowers are timed with precision helical gears that are keyed to the rotor shafts. Helical gearing reduces backlash and mechanical noise as compared to spur gears offered by other manufacturers. Keyed interference fit reduces the risk of slippage of the gear on the shaft and loss of timing, one of the leading causes of blower failure.

## **One Piece Housing**

Every EQUALIZER DF blower includes a housing constructed of a single piece of precision machined cast iron, rather than a two piece housing which is subject to misalignment and loss of operating clearances.

#### **Rotors with Integral Shafts**

EQUALIZER DF blowers include precision machined ductile iron rotors with large, integrally cast shafts to provide single, unitized rotors to prevent clash as a result of the impeller moving on its shaft.

| Model<br>Size | Max.<br>Press.<br>PSI | Max.<br>Vac.<br>(in. Hg) | Vac. Maximum D |      | Net Wgt.<br>(lbs.)* |
|---------------|-----------------------|--------------------------|----------------|------|---------------------|

| 4506          | 18                    | 16                       | 4000           | .164 | 285                 |
| 4509          | 18                    | 16                       | 4000           | .242 | 320                 |
| 4512          | 15                    | 16                       | 4000           | .321 | 360                 |

<sup>\*</sup>Approximate shipping weight.

#### Versatility

Completely field convertible from horizontal to vertical flow, or vice versa simply by rearranging oil breathers, drains and changing the mounting feet.

## **Material Specifications:**

Housing: Cast iron End Plates: Cast iron End Covers: Cast iron Rotors: Ductile iron

Shafts: Ductile iron cast integrally with rotor

**Bearings:** Gear end - Double row ball
Drive end - Cylindrical roller

**Drive Shaft:** Ductile iron cast integrally with drive rotor

Gears: Heat treated alloy steel, helical cut

Seals: Lip and piston ring labyrinth type on rotor shafts;

lip seal on the drive shaft

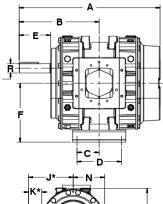

Lubrication: Oil splash system, both ends

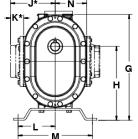

## **Performance Tables**

In conjunction with our program of continuous testing and design upgrading, all specifications are subject to change without notice. All data are approximate. Request a quotation for your specific application.

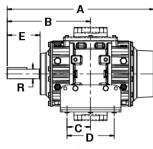

## Pressure (14.70 PSIA and 70° F Inlet)

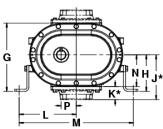

## Horizontal Flow

#### Vertical Flow
