The Gardner Denver DuroFlow® Family of Products

For nearly fifty years, Gardner Denver DuroFlow positive displacement blowers/vacuum pumps have combined leading-edge technology and on-the-job experience to continuously deliver enhanced designs and improved performance.

At-A-Glance Features

- Each model delivers clean, oil-free air to a wide range of industrial applications
- World-class engineering and design
- Manufactured under rigid ISO 9001 standards by quality craftspeople
- Exhaustively tested to meet strict performance criteria to ensure unequalled service life under the most severe operating conditions
- Available in the 30, 45 & 70 Series with various configurations and rotor lengths
- Horizontal or vertical mounting configuration available for each blower
- Supported by a worldwide network of trained professionals and backed by a manufacturer's warranty
 - 18 months from the date of shipment or
 - 12 months from the date of installation, whichever occurs first

30 Series Model 3004
Also available 3006

Durable

- Oversized bearings for added support and greater durability
 - Gear-end bearings support rotor shafts, while drive-end double-row angular contact ball bearings fix the rotor position
 - Prevents destructive axial rotor movement commonly caused by misaligned V-belt drives
- Durable single-piece cast iron cylinder with integral ribs¹
 - Provides greater strength and rigidity
 - Ribs improve heat dissipation and prevent distortion that can affect internal clearances and reduce performance
- Innovative rotor/shaft design machined from a single, high-strength ductile iron casting and dynamically balanced
 - Assures extra strength and rigidity to handle maximum loads on a continuous basis without fatigue, deflection or vibration
- Solid rotors (30 & 45 Series only)
 - Eliminates potential for vibration caused when hollow rotors become unbalanced due to build-up of ingested material inside the rotor cavities

DuroFlow = Durable, Reliable & Efficient

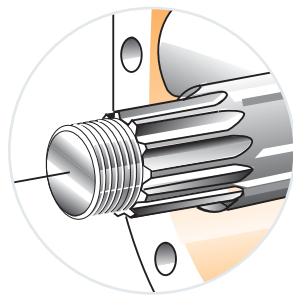

The DuroFlow Product Line Delivers

- Pressure to 15 psig
- Vacuum to 16" Hg
- Airflow to 4282 cfm

Experience Proven Results with Gardner Denver — the Leader in Durability, Reliability and Efficiency

Reliable

- Dual Splash Lubrication
 - Provides superior gear and bearing lubrication for longer life at all operating conditions
 - Reduces maintenance
- Advanced oil and air seal designs²
 - Piston rings and flinger maximize seal life in continuous, severe duty applications
 - Provides leak-free operation
 - O-rings placed under the drive shaft wear sleeve creates better sealing and prolongs life of rotors
- Timing gears are mounted on precision machined shaft splines
 - Assures secure non-slip rotor timing even under surge conditions or high torque start-up

Efficient

- Helical timing gears, precision machined from alloy steel forgings
 - Guarantees quiet and smooth mechanical operation at all speeds
- Innovative rotor profile with serrated tips²
 - Increases blower efficiency and air sealing
 - Reduces power consumption and cooler operating temperature
- Noise Reduction
 - Extra cylinder mass and progressive porting aid in reducing noise
- Vertical or horizontal mounting configuration with each blower
 - Provides greater flexibility for installing into any new or existing system

¹ Integral ribs are not available on models 4504 and 4506

² 45 Series only

Applications to Meet Your Industry Needs

Industry	Application
Aquaculture	Aeration
Cement & Lime	Fluidization & Conveying
Chemical	Vacuum Processing & Conveying
Dairy	Automated Milking
Dry Bulk Hauling	Trailer Unloading & Aeration
Environmental Services	Sewer Cleaning & Portable Restroom Services
Industrial	Material Vacuuming
Milling & Baking	Blending & Conveying
Power Generation	Fly Ash Conveying & Aeration
Pulp & Paper	Chip Conveying & Process Vacuum
Resin & Plastic	Processing & Conveying
Vacuum Excavation	Potholing & Slurry Recovery
Wastewater	Aeration & Backwashing

The table above illustrates industries which depend upon the DuroFlow Industrial Series to deliver clean, oil-free air to a wide range of global applications.

Reach Higher with the DuroFlow 45 Series

Product Design	DuroFlow 45 Series	Competitor A	Competitor B	DuroFlow Advantages
Models	5 sizes	4 sizes	4 sizes	<ul style="list-style-type: none"> • Greater flow capacity
Cylinder Design ¹	One piece cylinder	Two piece cylinder	One piece cylinder	<ul style="list-style-type: none"> • More rigid and durable • Noise & pulsation dampening • Ensures better tip clearance accuracy • Easier assembly / disassembly
Cylinder Rib Design ^{1, 2}	Integral cylinder ribs	Minimal cylinder ribs	Minimal cylinder ribs	<ul style="list-style-type: none"> • Improves heat dissipation • Reduces torsion on cylinder
Drive End Bearings ¹	Oversized double row ball angular contact (drive & non-drive shafts)	Single row ball (non-drive shaft)	Cylindrical roller	<ul style="list-style-type: none"> • Increases bearing life • Better equipped to handle radial & axial loads commonly caused by misaligned V-belt drives
Dual Splash Lubrication ¹	Common oil sump	Separate oil reservoirs	Separate oil reservoirs	<ul style="list-style-type: none"> • Simpler maintenance
Gear End Bearings	Roller bearing	Single row ball	Double row ball	<ul style="list-style-type: none"> • Increases bearing life
Gear Type ¹	Helical	Straight spur	Helical	<ul style="list-style-type: none"> • Quiet & smooth mechanical operation • Reduces backlash
Gear Attachments ¹	Spline gear fit	Taper gear fit	Keyed interference fit	<ul style="list-style-type: none"> • Eliminates timing loss and improves reliability
Impeller Tips	Serrated	Radius	Radius	<ul style="list-style-type: none"> • Improves performance • Reduces power consumption • Cooler operating temperatures
Main Air Seal	Piston ring	Piston ring	Piston ring	<ul style="list-style-type: none"> • Longer seal life • Less wear
Main Oil Seal	Two piston ring seals with slinger and groove	Lip seal	Lip seal	<ul style="list-style-type: none"> • Superior oil sealing
Shaft Seal ¹ & Seal Surface	Viton lip seal with o-rings wear sleeve	Viton lip seal on shaft	Lip seal on shaft	<ul style="list-style-type: none"> • Improves sealing method • Extended shaft life

¹ Also standard features on the 30 and 70 Series

² Model sizes 4509, 4512 & 4518

45 Series Design Advantages

Model 4504

Model 4506

Model 4509

Model 4512

Model 4518

Dual Splash Lubrication

- Reliable splash lubrication at both gear and drive ends for longer product life (5)

Shaft Splines Assure Non-Slip Rotor Timing

- Helical timing gears are mounted on shaft splines (6)
- Provides quiet and smooth mechanical operation at all speeds

Improved Design Provides Leak-Free Operation

- Advanced Oil and Air Seals
- Piston rings and flinger maximize seal life in continuous, severe duty applications

Efficient Lubrication

- Slinger ensures lubricant is distributed to gears and bearings

Oversized Bearings for Added Support and Greater Durability

- Drive-end double-row angular contact ball bearings fix the rotor position (3)
- Gear-end roller bearings support each shaft (4)

Striving for More

Solid Rotors Eliminate Potential for Vibration

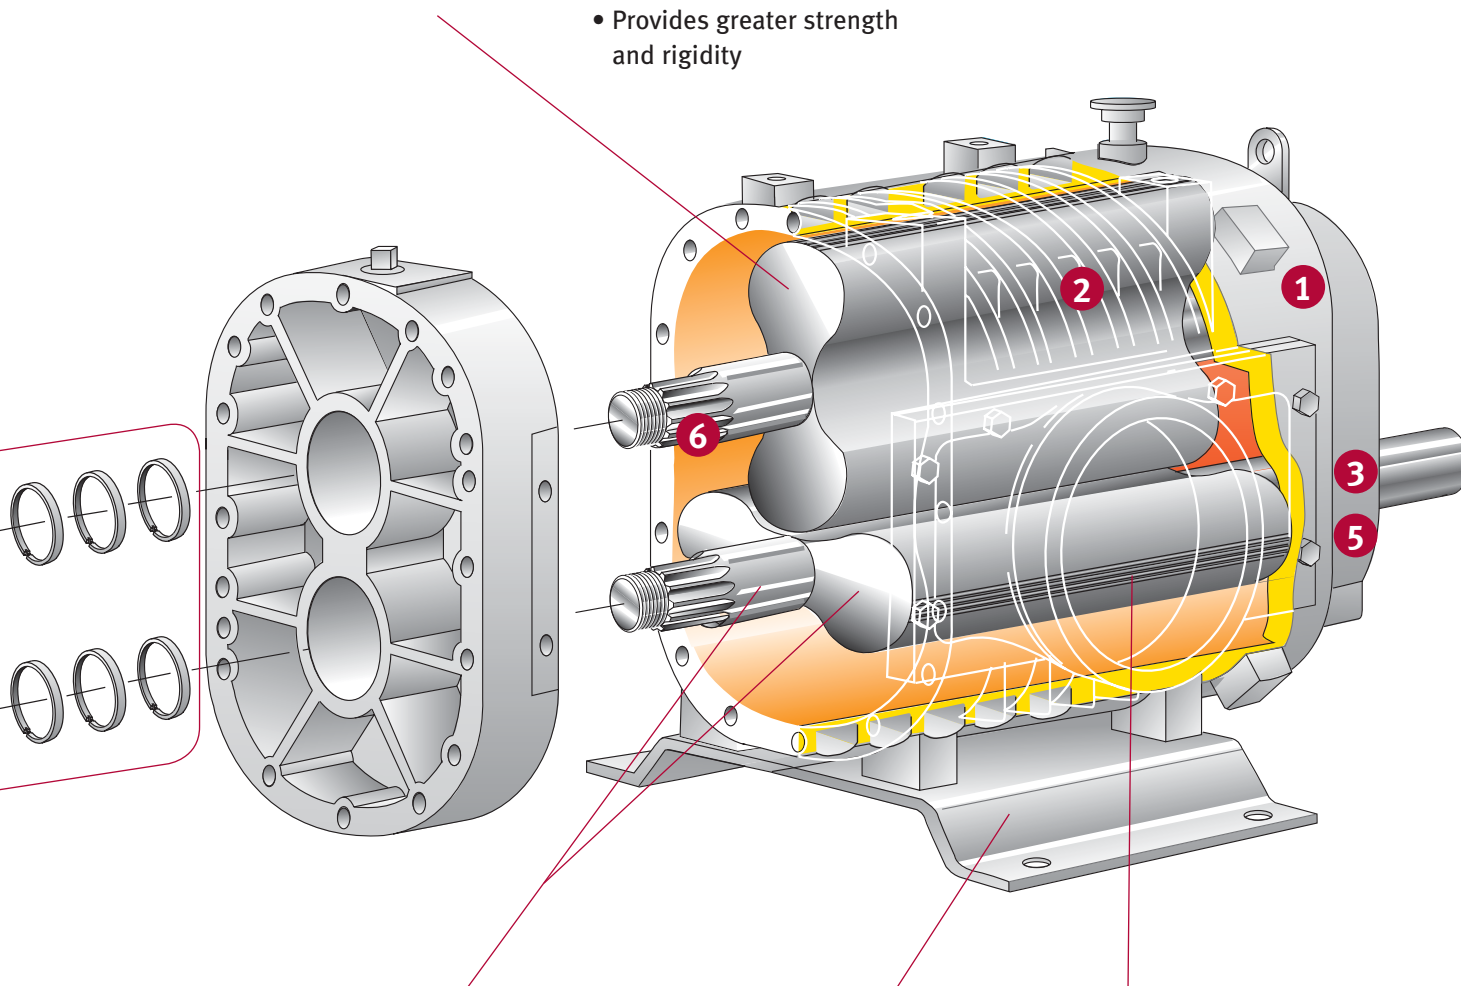

- Hollow rotors can become unbalanced due to build-up of ingested material inside the rotor

Single Piece Cylinder Prevents Distortion ⁽¹⁾

- Heavy-duty reinforced cast iron cylinder retains internal clearances
- Provides greater strength and rigidity

Cooler Operating Temperatures

- Integral ribs improve heat dissipation and improve performance ⁽²⁾

Durable Rotors & Shafts

- Machined from a single, high-strength ductile iron casting
- Dynamically balanced

Vertical or Horizontal Mounting Configuration

- Flex-Mount™ design standard with each blower
- Flexibility for installing into any new or existing system

Serrated Tips Reduce Power Consumption

- Innovative rotor profile provides tighter clearances
- More air flow with less horsepower
- Precision machined with advanced CNC milling technology

45 Series Model 4509

Model 4518

Flex-Mount™ Design Provides Maximum Installation Versatility

- Flex-Mount™ Design and available porting connectors provide installation flexibility
- Assures interchangeability of existing installed DuroFlow models or compatibility as replacement for most competitive models
- Reduces inventory requirements due to machine flexibility

70 Series Model 7015
Also available 7009, 7012, 7018, 7023, 7028

Performance based on inlet air at standard temperature of 68°F, an ambient pressure of 14.7 psia and 36% relative humidity.
For performance at non-standard conditions, contact your authorized Gardner Denver representative.

Genuine Gardner Denver Parts and Lubricants

- Maintain the Gardner Denver performance advantage and reliability with Genuine GD Replacement Parts
- Protect your Gardner Denver investment with AEON® PD, the only lubricant specially formulated for all blowers in any environment

– Now available:

- » AEON® PD-XD (eXtreme Duty)
- » Designed specifically for high ambient and high discharge temperature applications

– Also available:

- » AEON® PD (standard applications)
- » AEON® PD-FG (Food Grade)

Quality Promise

- Gardner Denver industrial blowers are manufactured under rigid ISO 9001 quality standards
- All models are thoroughly tested to meet the highest performance standards for unequaled service life under the most severe operating conditions

Gardner Denver Redefines the Perception of Remanufactured

Reman (rē man´) n. A Gardner Denver positive displacement blower expertly assembled from genuine remanufactured and new parts

- Must pass a slip test and a full-load, hot run test before shipment
- Standard new product warranty included
- The final word when repair or replacement is required
